

How do I setup my new iControl email with iPhone?

SETUP EMAIL – IPHONE

1. Tap on Settings
2. Tap on Mail, Contacts, Calendars
3. Tap on Add Account...
4. Tap on Other
5. Tap on Add Mail Account
 - a. Name - Your name as it will appear to others (in the email From line)
 - b. Address - Your email address (ex: john@domain.com)
 - c. Password - The password that was set in the Email section of iControl
 - d. Description - Name of the Email account (this will appear in your "My Accounts Screen on your iPhone)
 - e. Tap on Save once you have filled in the above four areas.
6. Tap on POP3
7. Fill in the following:
 - a. Name - Your name as it will appear to others (in the email From line)
 - b. Address - Your email address (ex: john@domain.com)
 - c. Description - Name of the Email account (this will appear in your "My Accounts Screen on your iPhone)
Incoming Mail Server
 - d. Host Name - **mail.YOURDOMAINcom** (example: my domain is innexus.com, then my Incoming Mail Server would be mail.innexus.com)
 - e. User Name - Your complete email address
 - f. Password - The password that was set in the Email section of iControl
Outgoing Mail Server
 - g. Host Name - **mail.YOURDOMAINcom** (example: my domain is innexus.com, then my Outgoing Mail Server would be mail.innexus.com)
 - h. User Name - Your complete email address
 - i. Password - The password that was set in the Email section of iControl
8. You may see an error message that the security certificate may not be valid. If so, tap on Continue until it no longer appears.
