Why do so many people skip their annual eye exam? We believe it's because they don't know what to expect. For this reason, we feel it's important to outline the process so you can feel comfortable knowing there's nothing to worry about.

Upon your arrival, our receptionist will welcome you as a member of our practice. We will ask you to complete a few forms. If you prefer to complete them in advance in the comfort

of your home, the forms may be found in the New Patient Center. This paperwork provides us with your health history and other information related to providing you with the best vision solutions.

Below, we've also included a list of the most commonly asked questions about coming in for an eye exam.
